**Look! THE New WESTINGHOUSE**

**THE REFRIGERATOR THAT COMBINES ALL 3 OF THESE ESSENTIAL REFINEMENTS..**

Made possible by the Compact Efficient Freezing Mechanism developed by Westinghouse Engineers.

Have you seen the New Westinghouse Refrigerator? If not, you really ought to take the time to look at it. It is worth—if you are the least bit interested in modern kitchen equipment—an hour of your time.

The low, flat Buffer-Top is so necessary when you are taking dishes out or putting them away. Without it, you must either search about for a place to lay them down or else handle them one at a time. And the Broom-High Legs to make underneath sweeping easy! And the Temperature-Selector to give you absolutely flexible control of freezing speed. You couldn't do without any of these refinements... and you can't find them all in any other machine.

For Westinghouse has a freezing mechanism which permits the building of a refrigerator that has these requisite features. This mechanism... perfected after 12 years of patient research and experimentation... is a complete innovation. It is decidedly fast freezing and is definitely more efficient and economical.
